

Dear candidate,

Thank you for showing interest in studying at the Hebrew University of Jerusalem. In order to begin the enrollment process I send to you the application form and essential information.

Please read the information on the site of the Authority for Research Students:
<http://www.research-students.huji.ac.il/en>

On the site you will find information concerning the terms of acceptance, application procedures and forms; information about command of languages, including English and Hebrew; about deadlines, tuition, health insurance etc.. Please also pay attention to the Regulations of the Authority for Research Students.

Please note that you have to establish a connection with a potential advisor in order to apply. A letter of commitment from a would-be advisor is a crucial pre-requisite for further processing your request.

In order to locate a suitable supervisor you may consult the web, look through published papers or write to the chair of the department for advice. On the site of the Authority for Research Students, as well as on the site of the Hebrew University, you will find useful information about the academic units and the academic staff of the Hebrew University and their fields of research.

Your Master's studies must include a Research Thesis. This is a compulsory condition for acceptance. The thesis will be evaluated by an expert to find out whether it meets the standards of a Research Thesis of a Master degree at the Hebrew University.

Your curricular activities and your diplomas will be evaluated by our experts shortly after you send all the documents. A detailed list of the required documents is presented on the application form. In order to begin the procedure please send all the required documents as scanned files according to the instructions on the form of application. Eventually, in order to be accepted you will have to present original official documents of your identification document, your diplomas and your records of studies.

A Disciplinary Doctorate Committee is in charge of screening candidates for Ph.D. studies. This Committee will discuss your application after your application file is completed and your previous studies and your Master thesis are evaluated as described above.

Any questions concerning scholarships and grants should be addressed to the future advisor.

Registration fees of 110\$ will be paid upon arrival to Israel.

If you wish to pursue the process please send us the requested documents.

With best wishes,

Racheli Amir
Director of the Authority for Research Students
